Dear Ms. Hernandez,

**Reference: Aquatic Facility Conceptual Plans Design & Cost Estimate Services RFQ#2014-28**

We are pleased to submit for your consideration the following revised proposal for professional services for the above referenced project in accordance with our Professional Services Agreement.

### **SCOPE**

As requested by the client, Stantec will prepare one conceptual design, cost estimate and Operational Cost and Potential Revenue Estimates for both sites. The concept design is to be located at JC Bermudez Park. The concept drawing will be developed using the JC Bermudez site as a basis of design and adapted to the site adjacent to the Southern Command, based on the final size and layout of the site. These concepts will be based on the following:

- a. Design # 1: 10-lane 25 meter competitive pool or a 50 meter competitive pool (or both), zero-depth entry level pool with water playground, lazy river, 1 and 3 meter diving boards, covered seating areas, bathhouse, concession area, locker rooms, multipurpose party room, an indoor office area and other additional amenities. This design should be based on the "Doral Aquatic Center Feasibility Analysis by Johnson Consulting dated April 14, 2014 Phase 1 Recommendation" (RFQ Exhibit "B").
- b. Conduct design workshop with client identified swim teams.
- c. Conduct public charrette for confirmation of proposed program above.
- d. Utility investigation and off-site improvements for each site.

### **APPROACH AND DELIVERABLES**

Stantec will conduct an initial meeting with staff and key stakeholders identified by the City to refine and confirm program requirements as stated above.

Stantec and its consultants, in conjunction with the City, will participate in a public charrette to discuss the various concerns regarding the proposed facility. The presentation will include images with commentary on features of other aquatic centers similar to that being considered for this project, background information on historic and contemporary issues in the industry, and an open- forum question-and-answer session to discuss concerns and needs of those individuals and groups attending

the meeting. A matrix of programming priorities will be developed and discussed to prioritize programming and facility features. The results from the interviews and charrette will be used to develop a needs profile.

Based on the initial meeting and charrette, we will develop a revised program including size and shape of pools to be approved by the City. Once the program is approved we will begin developing a conceptual site plan. We will then meet with the City and team to receive feedback and / or consensus on the conceptual site plan. Stantec will then take these comments and revise the conceptual site plan accordingly. We are expecting to conduct two meetings during this process prior to finalizing the conceptual site plan for approval by the Council.

The Conceptual Design Plan will consist of the one design as stated above for each site (if authorized), including master site plan, conceptual elevations of the building and conceptual renderings (1 for each option).

Stantec in coordination with the City will prepare packages for presentation to individual Council members. The meeting with the individual Council members will be held all in one day for approximately seven hours at the City Hall. The City is to coordinate and ensure that Council members will be available the day of the meeting.

Stantec and its Consultants will prepare an Opinion of Probable Construction Cost for the pool(s) and building(s). Recent project bid figures of similar projects estimating guides and local cost adjustment factors (as well as national) will be used to prepare an opinion of probable cost of construction. The opinion of probable cost of construction will be supplemented by a development cost factor, which will include such "soft" costs as professional fees, survey, geotechnical report, document reproduction, advertisement for bids and all anticipated expenses related to the administration of the project. The sum of these two cost figures will be the total project cost so that the Owner will have a comprehensive overview before making an informed decision about the project.

Stantec and its Consultant will prepare an Opinion of Revenue and Probable Expenses for the proposed facilities based on our independent research and analysis.

Summary of Deliverables: Deliverables shall include:

- Minutes for all meetings with staff and stakeholders
- Charrette presentation and materials
- Preparation of project program
- Design Submittals and renderings for preliminary on 11"x17" format

WHEREAS, the Lead Consultant, is undertaking a Feasibility Study Plan for an aquatic center located in Doral, FL and,

WHEREAS, the Consultant is a consultant in the field of swimming pool complex planning and design, and

WHEREAS, the **Lead Consultant**, is desirous of retaining the Consultant as its independent contractor for purposes of planning the aquatic center.

NOW, THEREFORE, in consideration of the covenants and agreements herein contained, the parties hereto agree as follows:

I. SERVICES.

The **Lead Consultant**, hereby retains the Consultant as its aquatic planning and design consultant for the proposed project. The scope of the Consultant's services are:

NEEDS ANALYSIS:

\$2,500

A. Meet with the steering committee, plus any designated community groups and/or individuals involved in the project to analyze needs and determine objectives. The Consultant will conduct individual interviews as necessary with, for example, local education administrators and/or athletic directors, chamber of commerce representatives, business leaders, private and public recreation providers, health professionals, competitive swim groups, swim coaches, instructors, activity programmers, youth and seniors groups, and others if requested in order to ascertain existing levels of service and the perceived needs of various user groups in the community.

\$1,000

B. In addition to individual meetings, The Consultant will participate in a public or by invitation civic meeting to discuss the various issues concerning the proposed facility. This discussion will include images and/or video presentations with

commentary on features of other aquatic centers similar to that being considered for this project, background information on historic and contemporary issues in the industry, and an open-forum question-and-answer session to discuss concerns and needs of those individuals and groups attending the meeting. A matrix of programming priorities will be developed and discussed to prioritize programming and facility features. The Consultant will use the results of the interviews and public workshop to develop a needs profile.

\$1,000 C. Conduct research and compile demographic information necessary to appropriately evaluate the proposed facility, including population, age distribution, income, weather analysis and economic considerations that could affect the project's viability.

\$ 500 D. Prepare and submit an outline of a Design Program of spaces and features for the proposed aquatic center describing the natatorium, pool size, shape and support spaces based on preliminary discussions and meetings noted above.

\$ 500 E. Based on the first meeting and committee's review of the outline program, develop with the Owner or architect a Design Program for the building with recommendations on the size and shape of the pool(s) as well as architectural and engineering features of the building and support spaces.

CONCEPTUAL PLAN:

\$6,000  
SITE 1 \$4,000  
SITE 2 \$2,000

A. Based on the agreed upon program, the Consultant will prepare one concept for both sites. This concept will be based on the following:

a. Design # 1: 10-lane 25 meter competitive pool or a 50 meter competitive pool (or both), zero-depth entry level pool with water playground, lazy river, 1 and 3 meter diving boards, covered seating areas, bathhouse, concession area, locker rooms, multipurpose party room, an indoor office area and other additional amenities. This design should be based on the Doral Aquatic Center Feasibility Analysis (Exhibit "B") phase 1 recommendation.

\$3,000  
SITE 1 \$1,500  
SITE 2 \$1,500

B. The Consultant will provide a conceptual plan of each pool. The purpose of the plans will be to illustrate ways to organize the spaces in a functional arrangement and to confirm that the footprint will contain the areas proposed in the Design Program.

\$1,000

C. The Consultant will meet a second time with the committee to participate in a design workshop. Preliminary concepts and program features will be reviewed and confirmed.

\$1,000  
SITE 1 \$500  
SITE 2 \$500

D. Following the meeting, the Consultant will make revisions to the selected plan, if necessary, and send back to the Committee.

\$1,500

SITE 2 \$ 500

- E. The Consultant will prepare an Opinion of Probable Construction Cost for the pool(s) and building. Recent project bid figures of similar projects will be used as well as national estimating guides and local cost adjustment factors. The hard **construction cost** figures will be supplemented by a development cost factor, which will include such "soft" costs as professional fees, survey, geotechnical report, document reproduction, advertisement for bids and all anticipated expenses related to the administration of the project. The sum of these two cost figures will be the **total project cost** so that the Owner will have a comprehensive overview before making an informed decision about the project.
